PROFESSIONAL SUMMARY

Full-Stack Software Engineer with close to six years of experience designing, building, and delivering scalable, high-performance web applications using React and Spring Boot. Strong track record in fintech and capital-markets systems brokerage, trading, and IPO platforms serving international financial-services clients spanning REST API design, reusable UI architecture, event-driven integrations, and enterprise database optimization. Experienced in providing hands-on technical direction through code reviews, mentoring, and delivery ownership across the full development lifecycle. BSc in Computer Science (Second Class Upper). Seeking an role where I can combine hands-on engineering with technical leadership on business-critical, cloud-ready systems.

CORE SKILLS

- **Frontend:** React, Angular, TypeScript, JavaScript, HTML/CSS3
- **Backend:** Java 17 / 21, Spring Boot, JPA / Hibernate, API design (REST, Websocket)
- **Databases:** Oracle, MySQL, PostgreSQL, MongoDB
- **Messaging & Caching:** JMS, ActiveMQ, FIX protocol, Infinispan
- **Cloud & DevOps:** AWS, Docker, Git

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Full Stack

DirectFN Sri Lanka (Colombo) — 1 year onsite, Saudi Arabia *May 2021 – Present*

Fintech / capital-markets software — brokerage, trading and IPO platforms for international financial-services clients.

- Provided hands-on technical leadership: led feature development, conducted code reviews, and mentored junior and associate engineers.
- Designed and delivered enterprise full-stack modules with React, Angular, Spring Boot and Oracle - REST APIs, reusable UI components, and system integrations for high volume transactional platforms.
- Built and maintained event-driven integrations processing exchange (FIX) messages over JMS on JBoss / WildFly using message-driven beans, supporting high-throughput order and market-data flows.
- Owned delivery for assigned modules — led data-migration activities and played an active role in multiple business-critical Go-Live events.
- Optimized Oracle performance for large transactional and reporting workloads through partition pruning, execution-plan analysis, indexing, and query redesign.
- Delivered onsite production support in Saudi Arabia, working directly with international clients on root-cause analysis, issue resolution, and performance improvements.

Key projects:

- **IPO Platform / Web -** UI + REST API development, enhancements, application integrations, requirement analysis, mentored juniors and led code reviews.
- **OMS -** JMS / FIX message-processing service (message-driven beans), Transaction processing
- **ALKB -** Database patching, production fixes, deployments, feature testing, and cross-team collaboration.

Full-Stack Engineer (Intern)

Inova IT Systems (Colombo) *Oct 2020 – Apr 2021*

- Contributed to full-stack development of ETFB, a web-based application. Requirements gathering & analysis, system design, development, integrations, testing, and bug fixing across the full SDLC (Angular, Spring Boot, Mysql, Swagger).

Full-Stack Developer (Part-Time)

TESS-TA OCR System & Sri Lanka Foundation *2019 – 2021*

- TESS-TA OCR - Implemented client-driven features for a tri-lingual (Sinhala / English / Tamil) OCR platform. Dockerized the application for multi-environment deployment and hosted it on GCP (Spring Boot, React, MySQL, Docker).
- Sri Lanka Foundation Virtual Conference Platform - Built a virtual conference platform that hosted a live exhibition for thousands of concurrent users, with virtual booths, networking, and live events (React, Express, MongoDB, AWS, Firebase).

EDUCATION

BSc in Computer Science (GPA 3.53, Second Class Upper) — University of Colombo School of Computing

G.C.E. Advanced Level — Royal College, Colombo
